

11th CEF Networks Workshop, Prague

Optical footprint of KREONET/KREONet2 improvement and other research and development activities

April 19, 2023

Buseung Cho

Director of KREONET, KISTI
Ph.D. Principal Researcher,

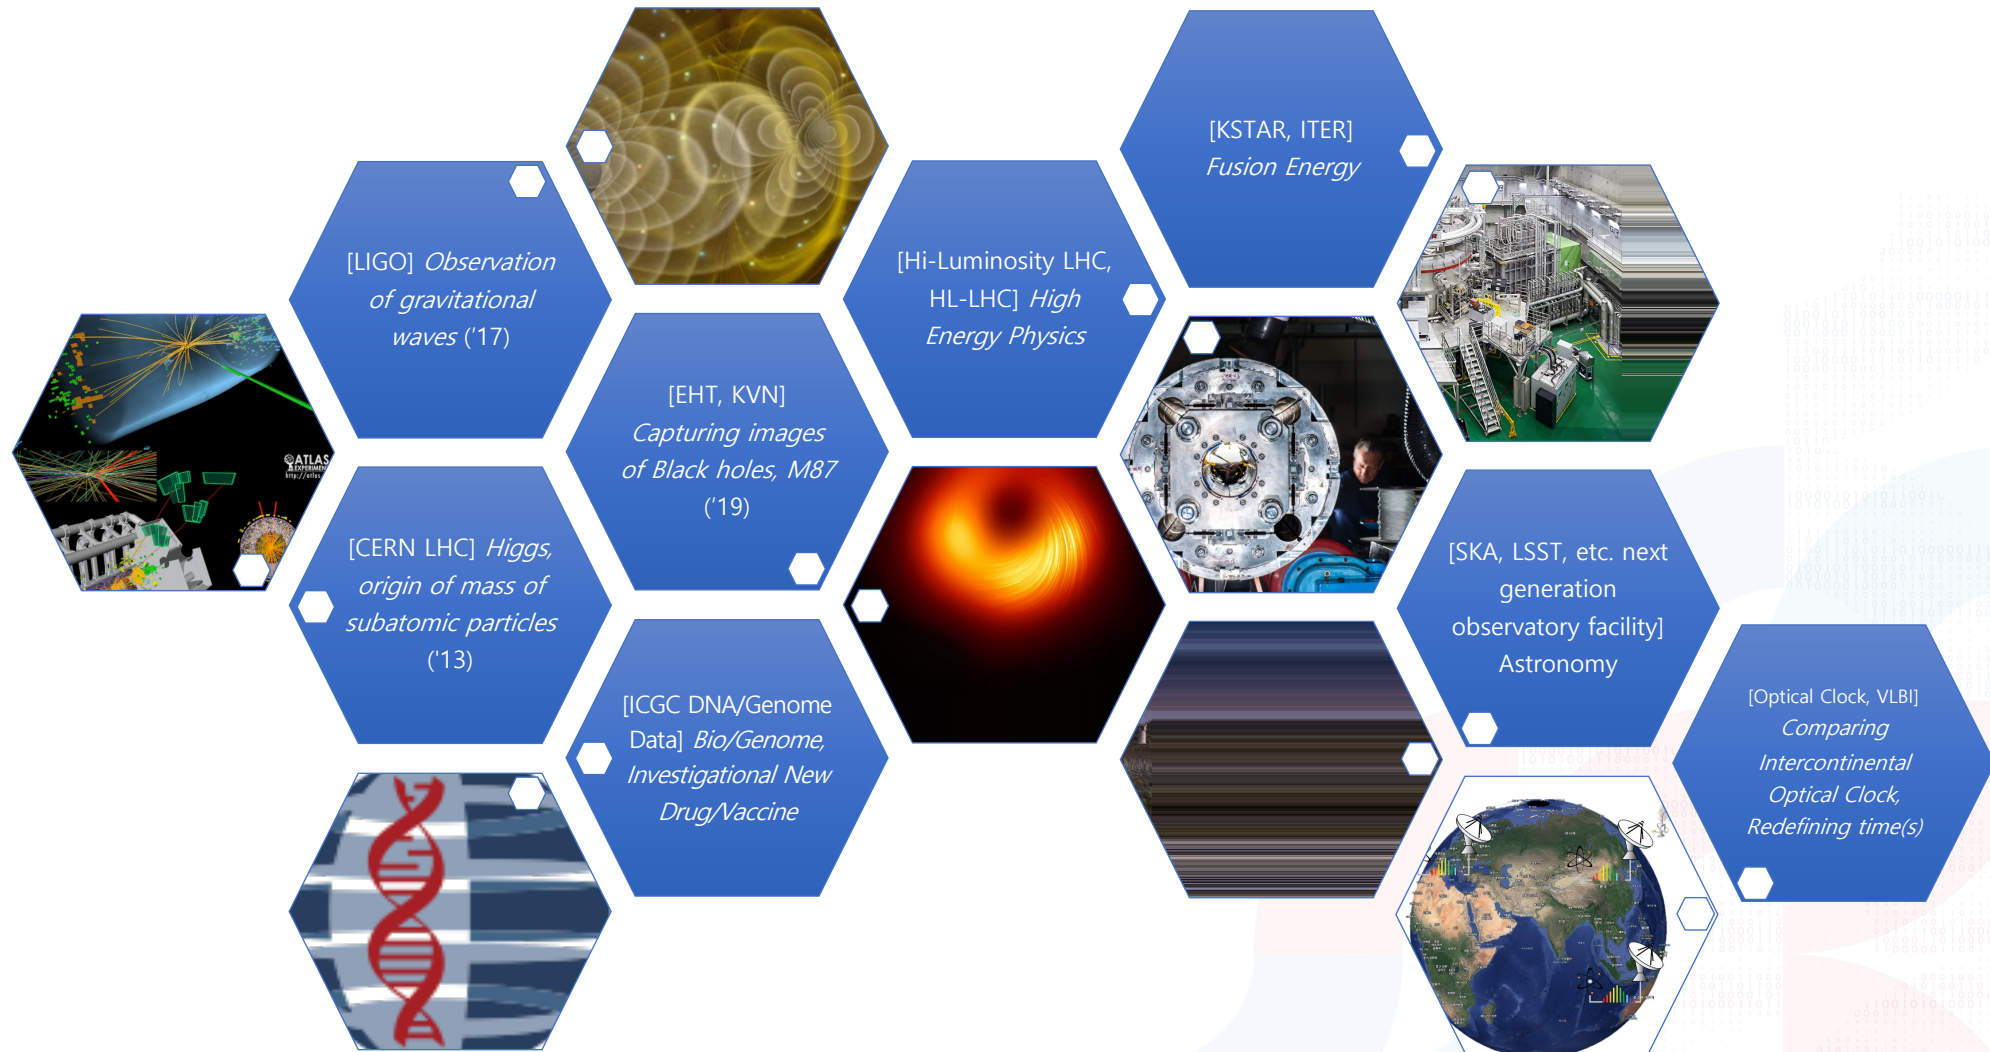

Associate Professor, UST

S&T Infra,

Changing the world with Data **KiSTi**

KREONET

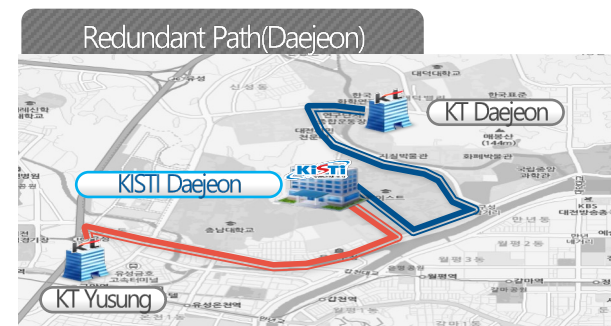

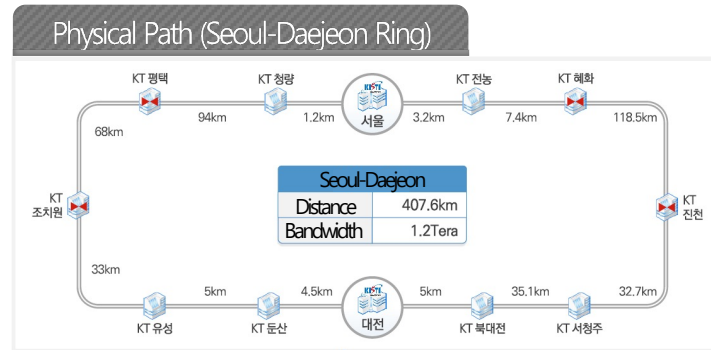

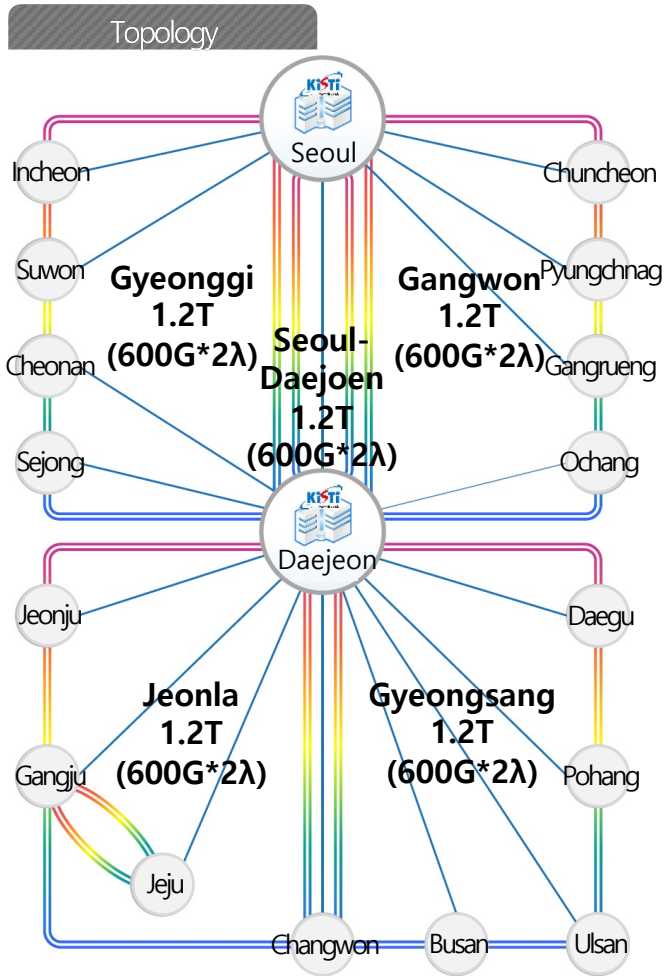

Big science, Data Intensive Science, Interdisciplinary research

KREONET/KREONet2 (AS1237/AS17579)

- KREONET (Korea Research Environment Open Network)
- Korea's National Science & Research Network, managed and operated by KISTI since 1988
- GLORIAD-KR, Core Member of GLORIAD project since 2005
- Advanced Research Network in “Utilization and Promotion of National Supercomputing” Act (implemented in 2011 in Korea)
- 100Gbps national-wide backbone with 17 Domestic Regional GigaPoPs and 5 International GigaPoPs
- About 200 connected R&E organizations : National Research Institute and Lab, University, University Hospital, Research Institute of Company, library, Public Sector etc.
- 365*24 NOC (Network Operation Center) Service
- Directly linking domestic internet exchanges (KT, SKB, Sejoing Telecom) and international internet exchanges (GIX/Seoul, Cogent/Seattle, AMS-IX/Amsterdam(to-be), HK-IX(to-be))
- Directly connected to network of public clouds (Google, Amazon, Microsoft)
- L1 Lightpath, L2 VPN, L3 R&E IP service, Science DMZ

KRLight

- GLIF Open Lightpath Exchange (GOLE), managed and operated by KISTI
- Transcontinental GOLE (GLIF Open Lightpath Exchange) : **Asia – North America - Europe**
- Distributed GOLE: Daejeon/KR, Hong Kong/CN, Seattle/US, Chicago/US, Amsterdam/NL
- Integrated with R&E IP network : KREONet2 (AS17579)

Devices

ROADM(22EA)	Ciena AF6500-14	PTN(30EA)	Ciena 5164

Map of KREONET 2023

Korea Research Environment Open NETwork

Ciena 6500-14/6154
600Gbps Wavelength
6Tbps Total Capacity
100/400GE L2 Interface

Cisco NCS5504/57C3
SR-MPLS, SR-TE, TI-LFR
L2/L3 VPN

Network Automation with
NSO (Network Service Orchestration)

aponet ASIA PACIFIC OCEANIA NETWORK (APOnet)

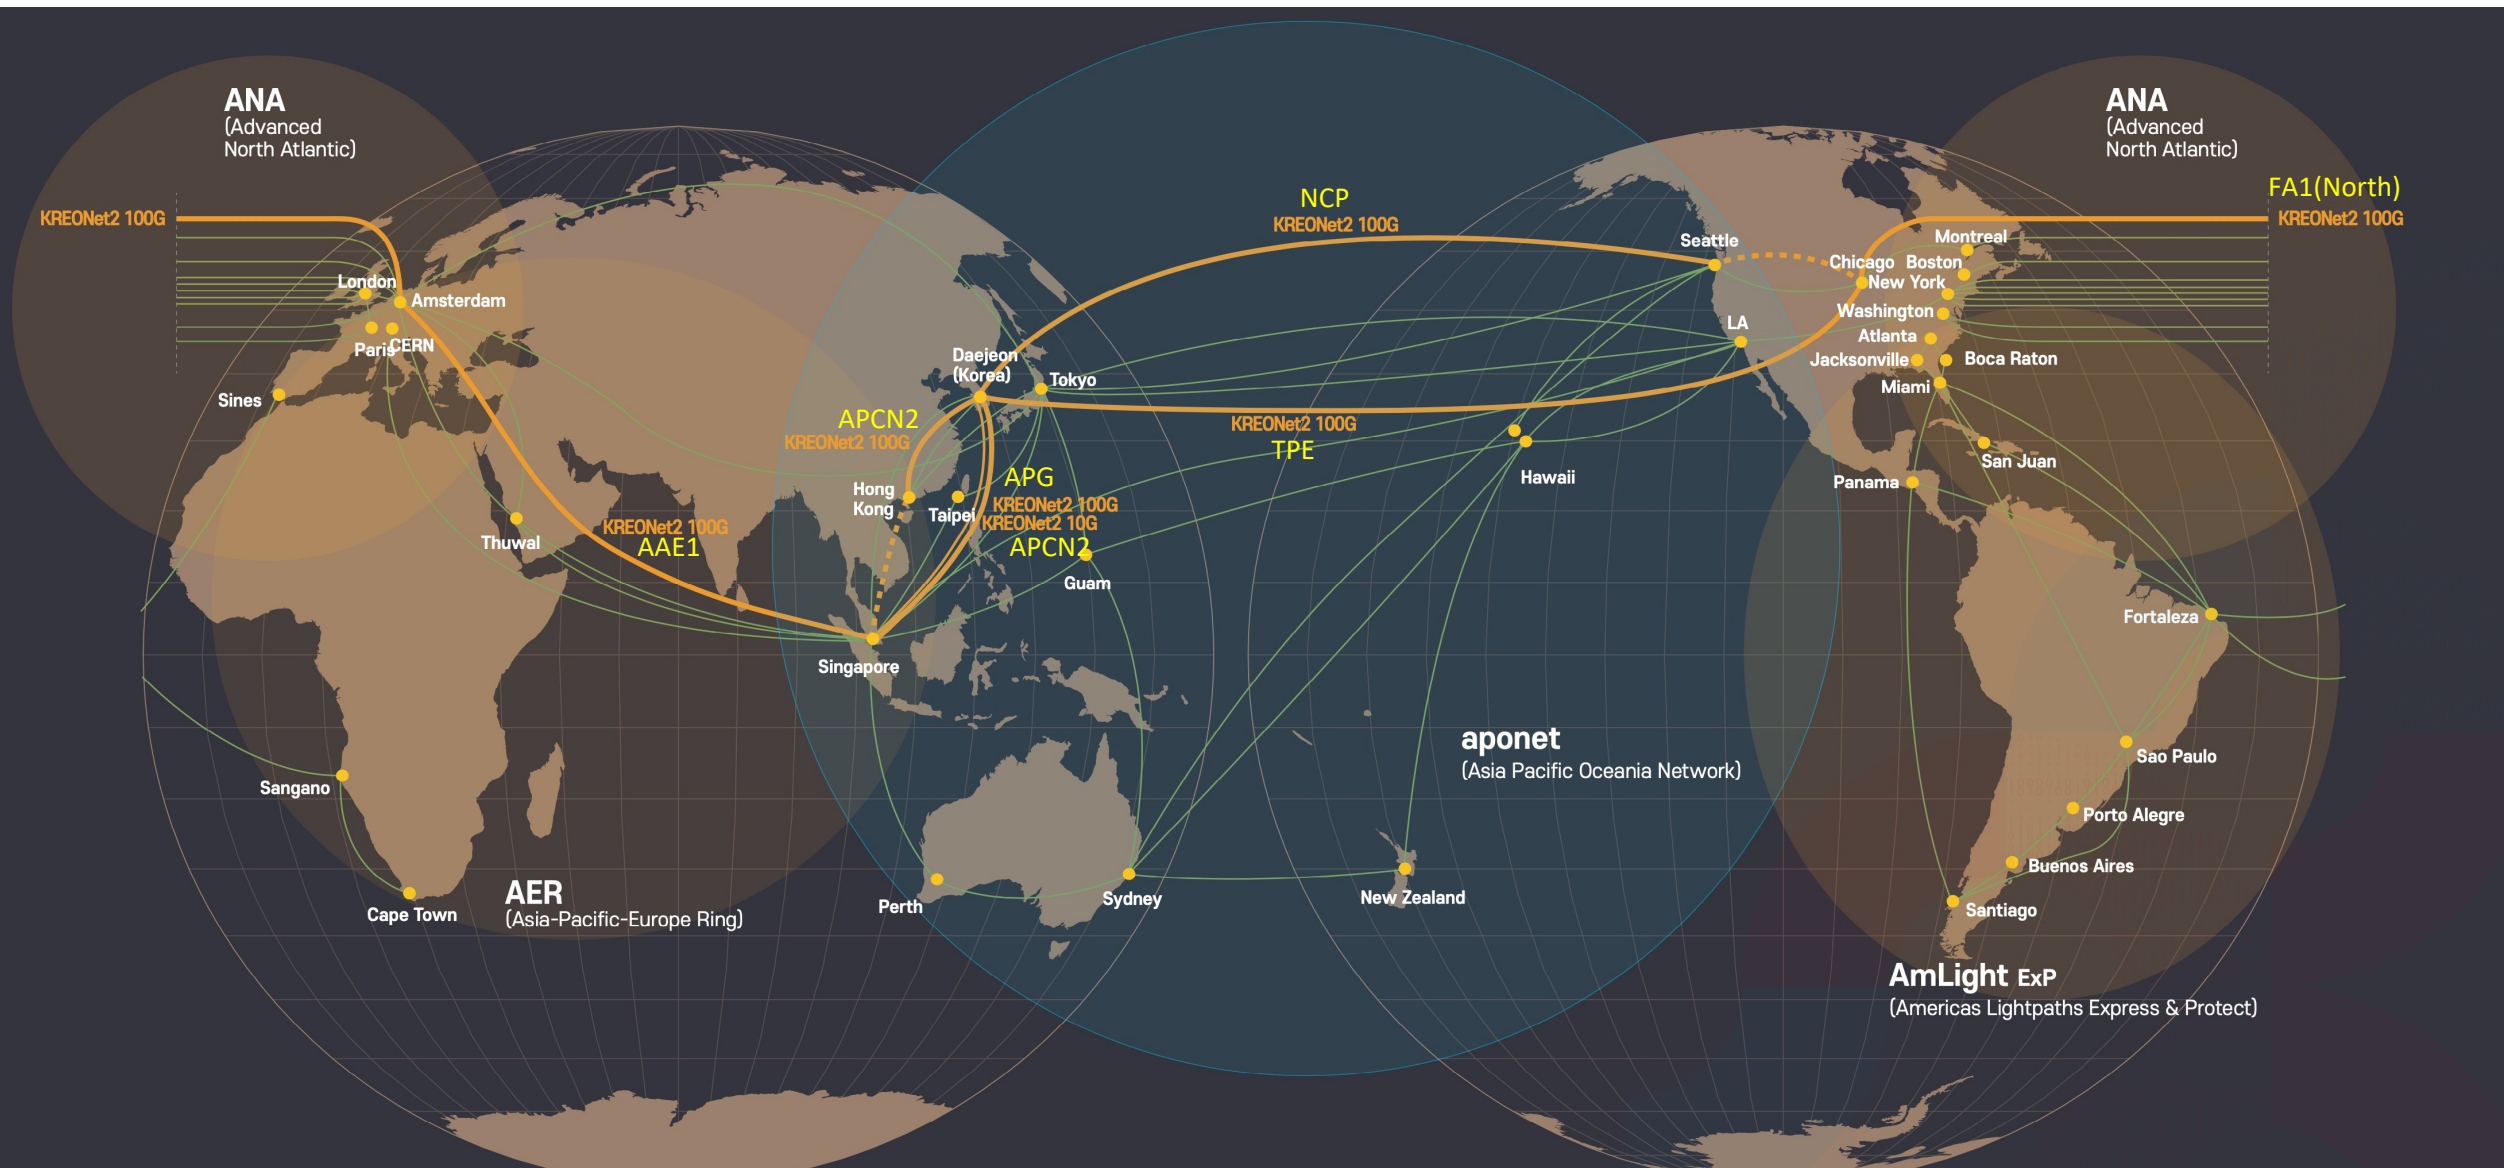

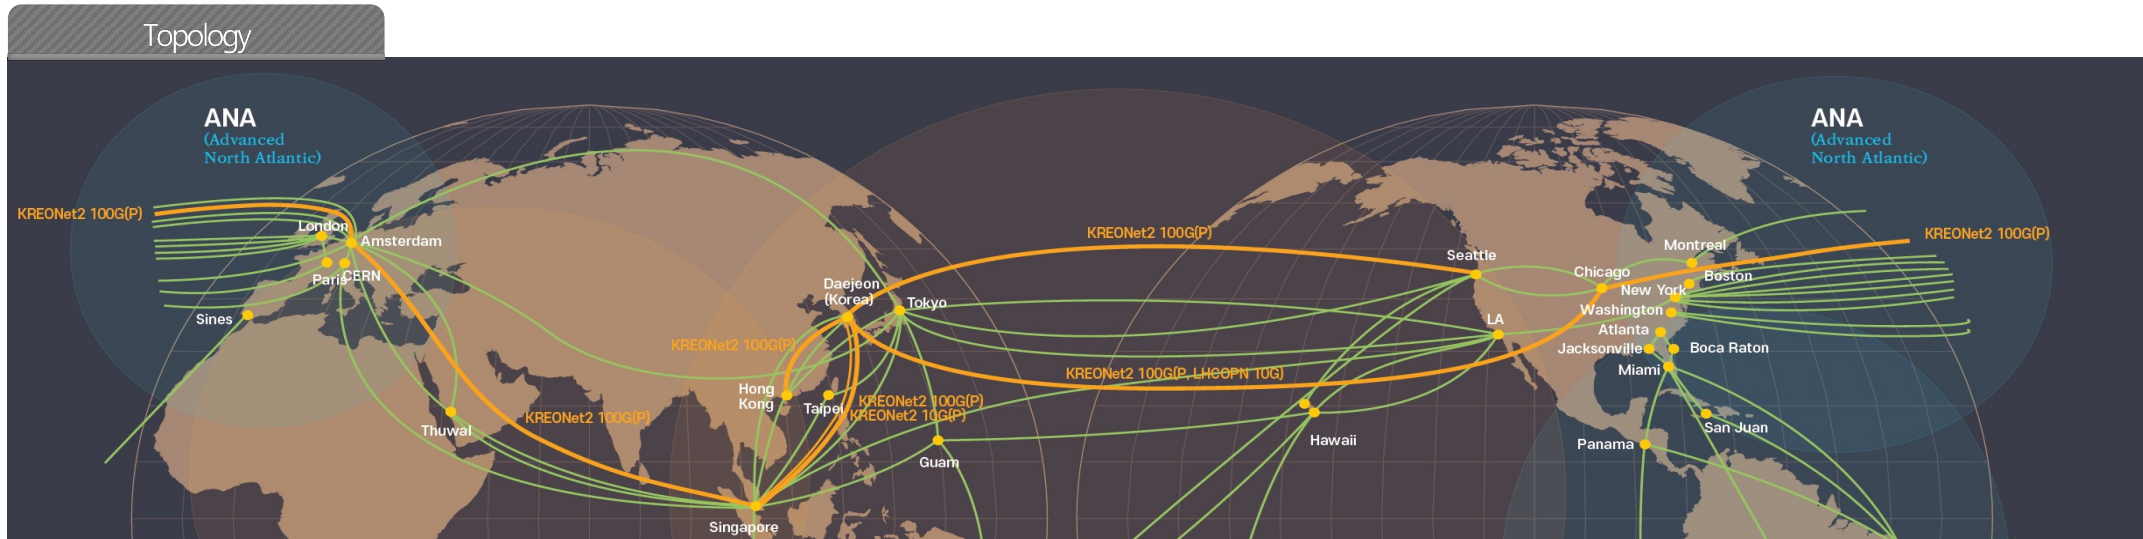

AER ASIA-PACIFIC EUROPE RING

- HARNET, NICT & SingAREN
- NII
- GEANT, SURF, NORDUnet, AARnet, SingAREN & TEIN*CC
- KAUST
- KISTI

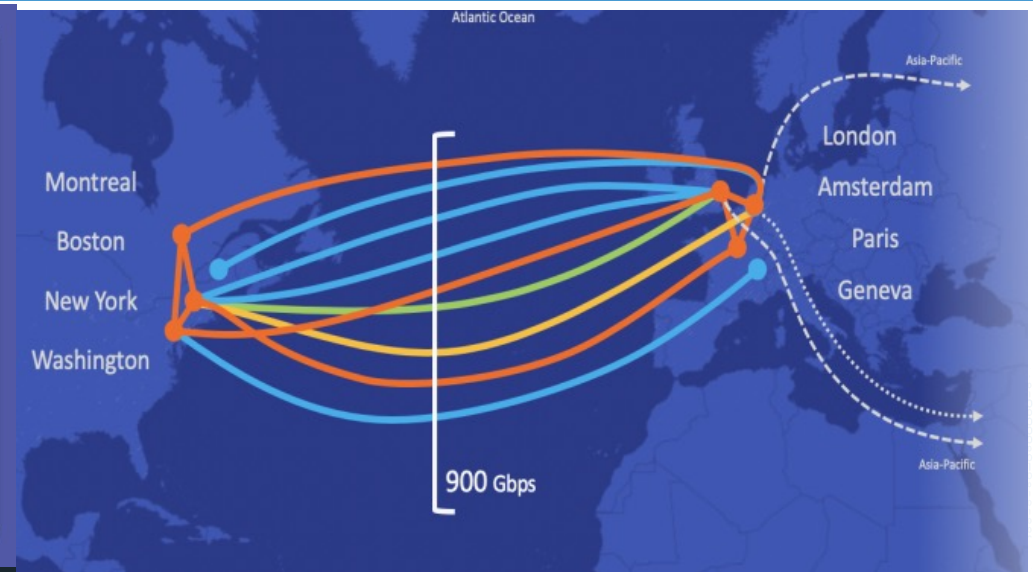

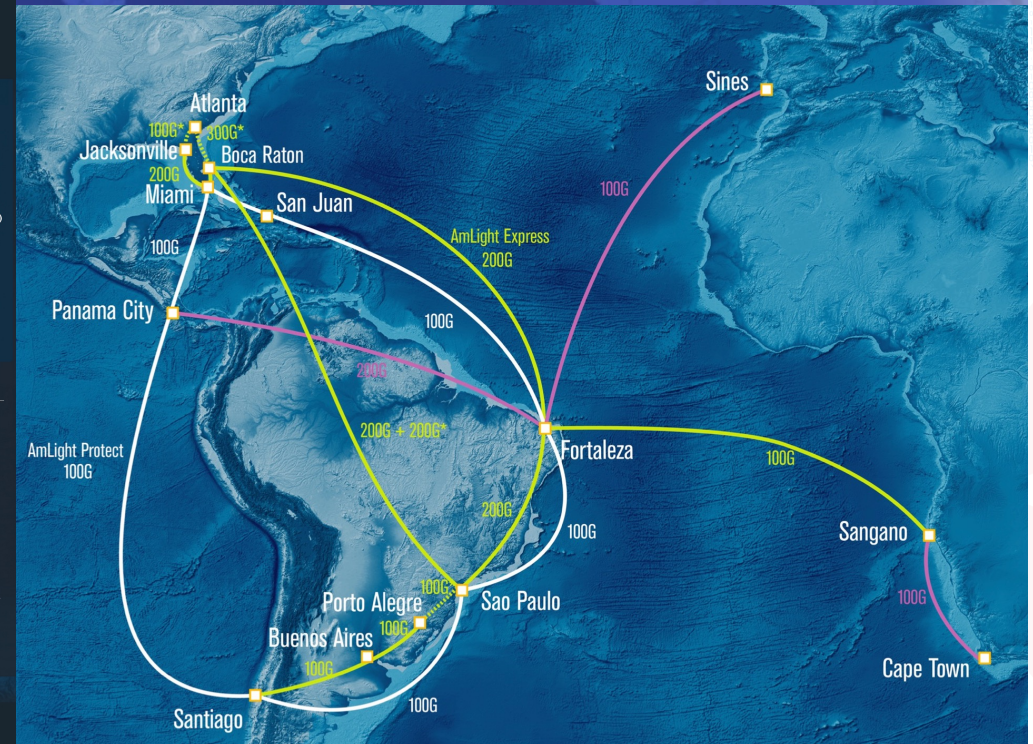

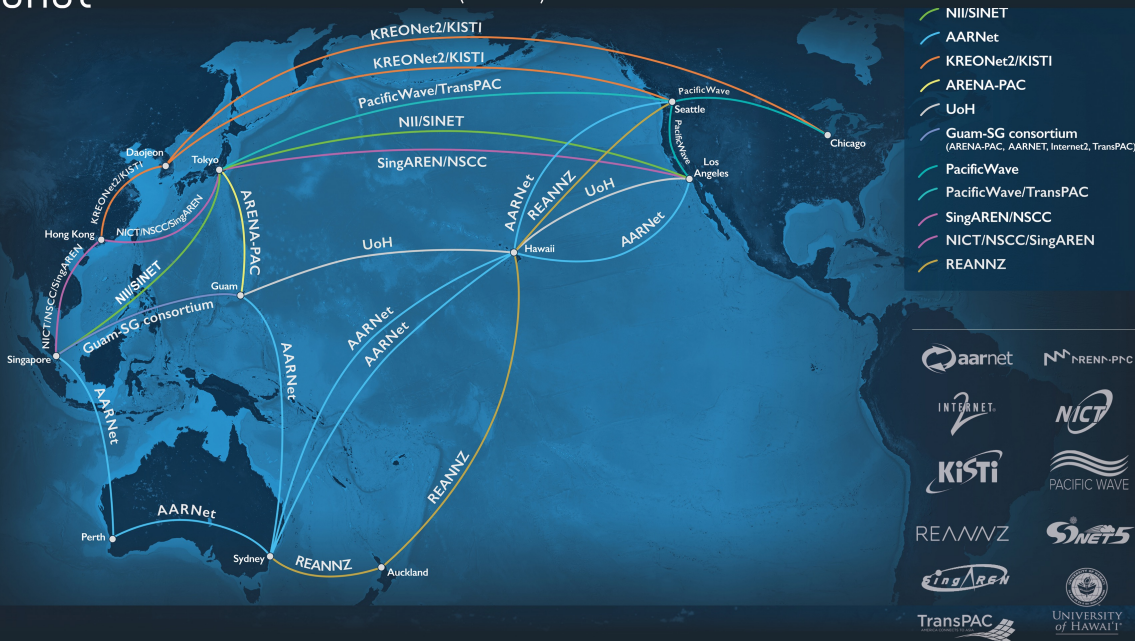

Cable System **68,590KM long**

01	Daejeon-Hong Kong 100G	4,410 km	Daejeon	(280km) underground	Busan	APCN2 (4,070km) submarine	TongFuk	(60km) underground	Hong Kong
02	Daejeon-Singapore 100G	5,705 km	Daejeon	(280km) underground	Busan	APG (5,390km) submarine	Changi	(35km) underground	Singapore
03	Daejeon-Singapore 10G	10,776 km	Daejeon	(280km) underground	Busan	APCN2 (10,476km) submarine	Katong	(20km) underground	Singapore
04	Daejeon-Seattle 100G	10,936 km	Daejeon	(300km) underground	Busan	NCP (10,413km) underground	ViaWest	(243km) underground	Seattle
05	Daejeon-Chicago 100G	14,638 km	Daejeon	(520km) underground	Geoje	TPE (10,888km) submarine	hillsboro	(3,500km) underground	Chicago
06	Singapore-Amsterdam 100G	14,463 km	Singapore	(1,650km) underground	-	AAE1 (12,500km) submarine	Butterworth	(313km) underground	Amsterdam
07	Chicago-Amsterdam 100G	7,652 km	Chicago	(1,310km) underground	NorthPort	FA-1(North) (5,300 km) submarine	Skewjack	(1,042km) underground	Amsterdam

Global Research and Education Network (GREN), GNA-G Compliant

aponet ASIA PACIFIC OCEANIA NETWORK (APOnet)

5 years funding (about 10M USD) new project (2023~)

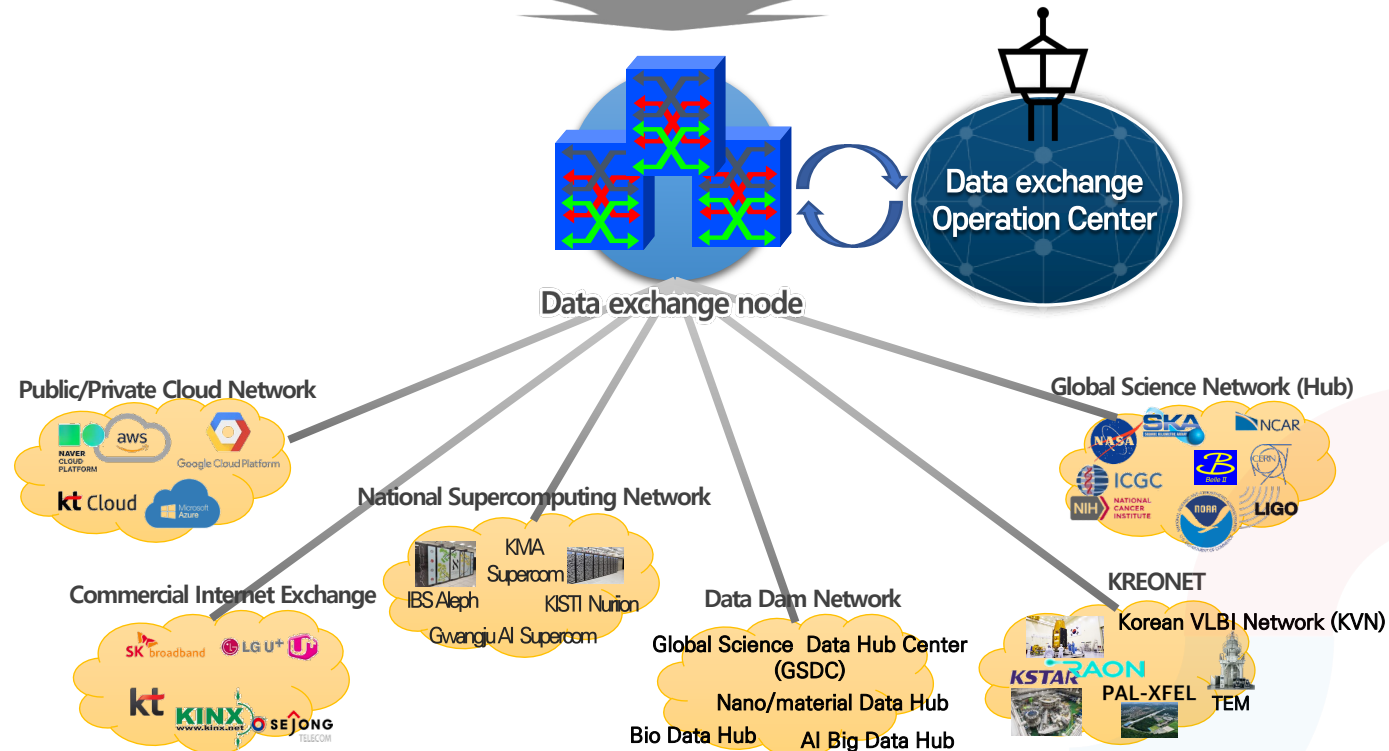

4 Key Technologies of Data exchange

1. High Performance (non-blocking)
Optical/Packet Switching Fabric

2. Software Data eXchange

3. Trust-based access and control
mechanism for Data exchange

4. High-precision Operation and
Management of Data exchange

- KOEXP as Korea Data Exchange Facility, the first open exchange in Korea
- Built and operated by KISTI/KREONET
- **Collocation space** in datacenter facility nearby largest submarine cable landing station (CLS) in Busan city
- **Convenient Access Point** for Asia Pacific Submarine Cables with reliability
- DCI interconnection btw KREONET/KREONet2 and KOEXP
- **Free backhaul connection btw KOEXP and CLS**
- Distributed KOEXP (Busan, Daejeon, and Seoul)
- Research and Education Network: KREONET/KREONet2, National Supercomputing Network, etc.
- Public Cloud Network: NHN Cloud, Naver Cloud, ...
- Open in June/July, 2023

Benefits of KOEXP@ Busan

The first Open Exchange located in Busan Cable Landing Station ever

Enough capacity of Submarine cables from East and West

Simply connect on submarine cables with cross-connections

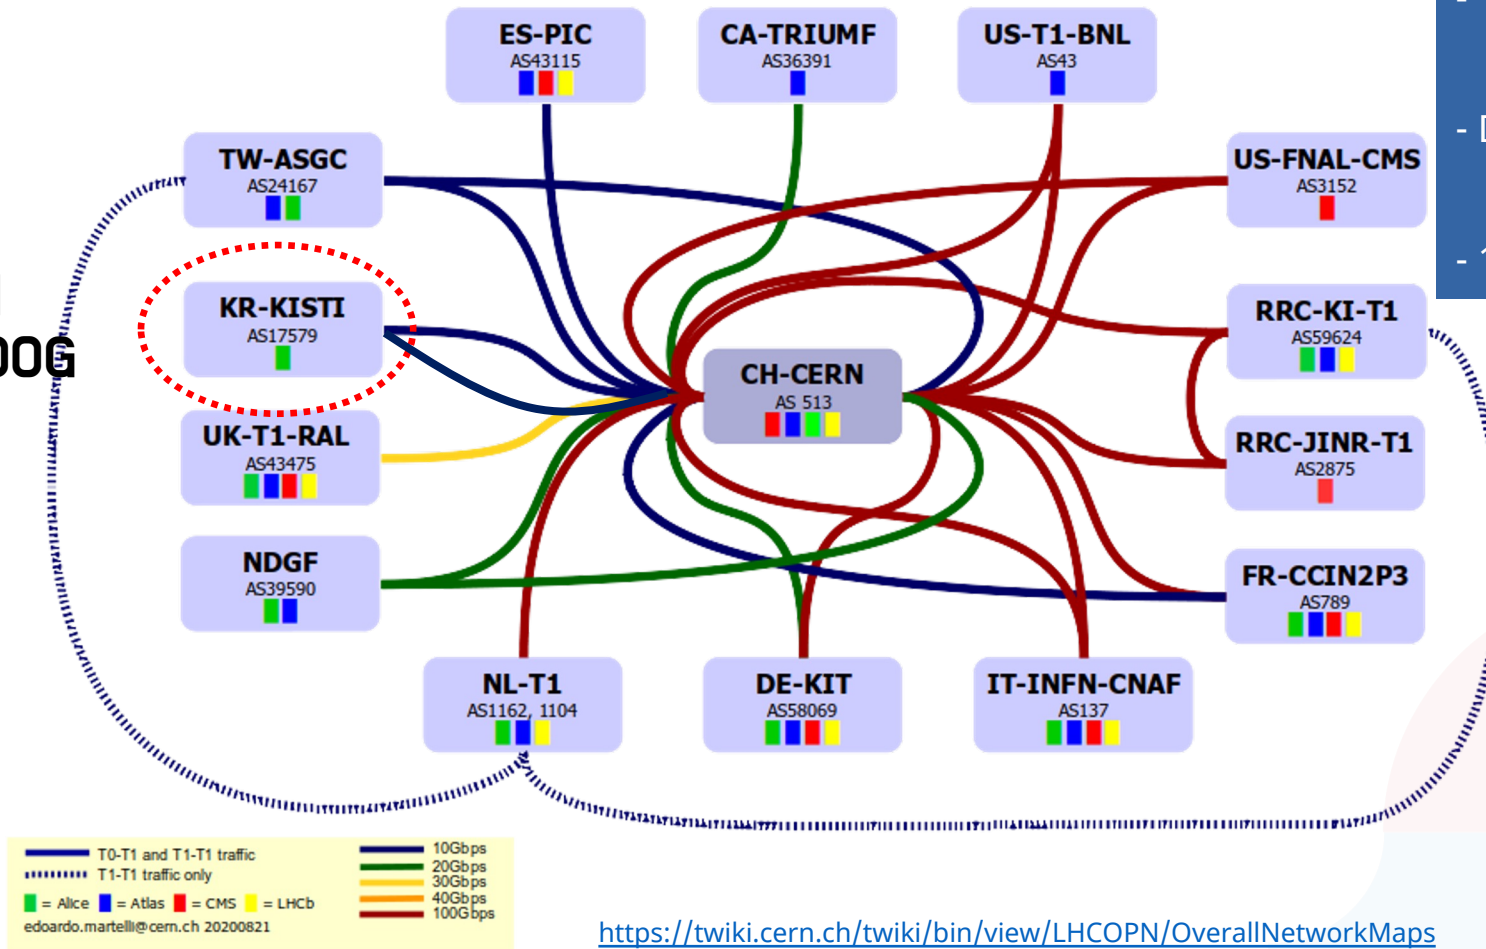

Operated by Experts Group of Submarine Cable NOC (KT) and KISTI

LHCOPN LHC Optical Private Network

Private network connecting Tier0 and Tier1s

- ### Numbers
- 14 Tier1s + 1 Tier0
 - 12 countries in 3 continents
 - Dual stack IPv4-IPv6
 - 1.1Tbps to the Tier0

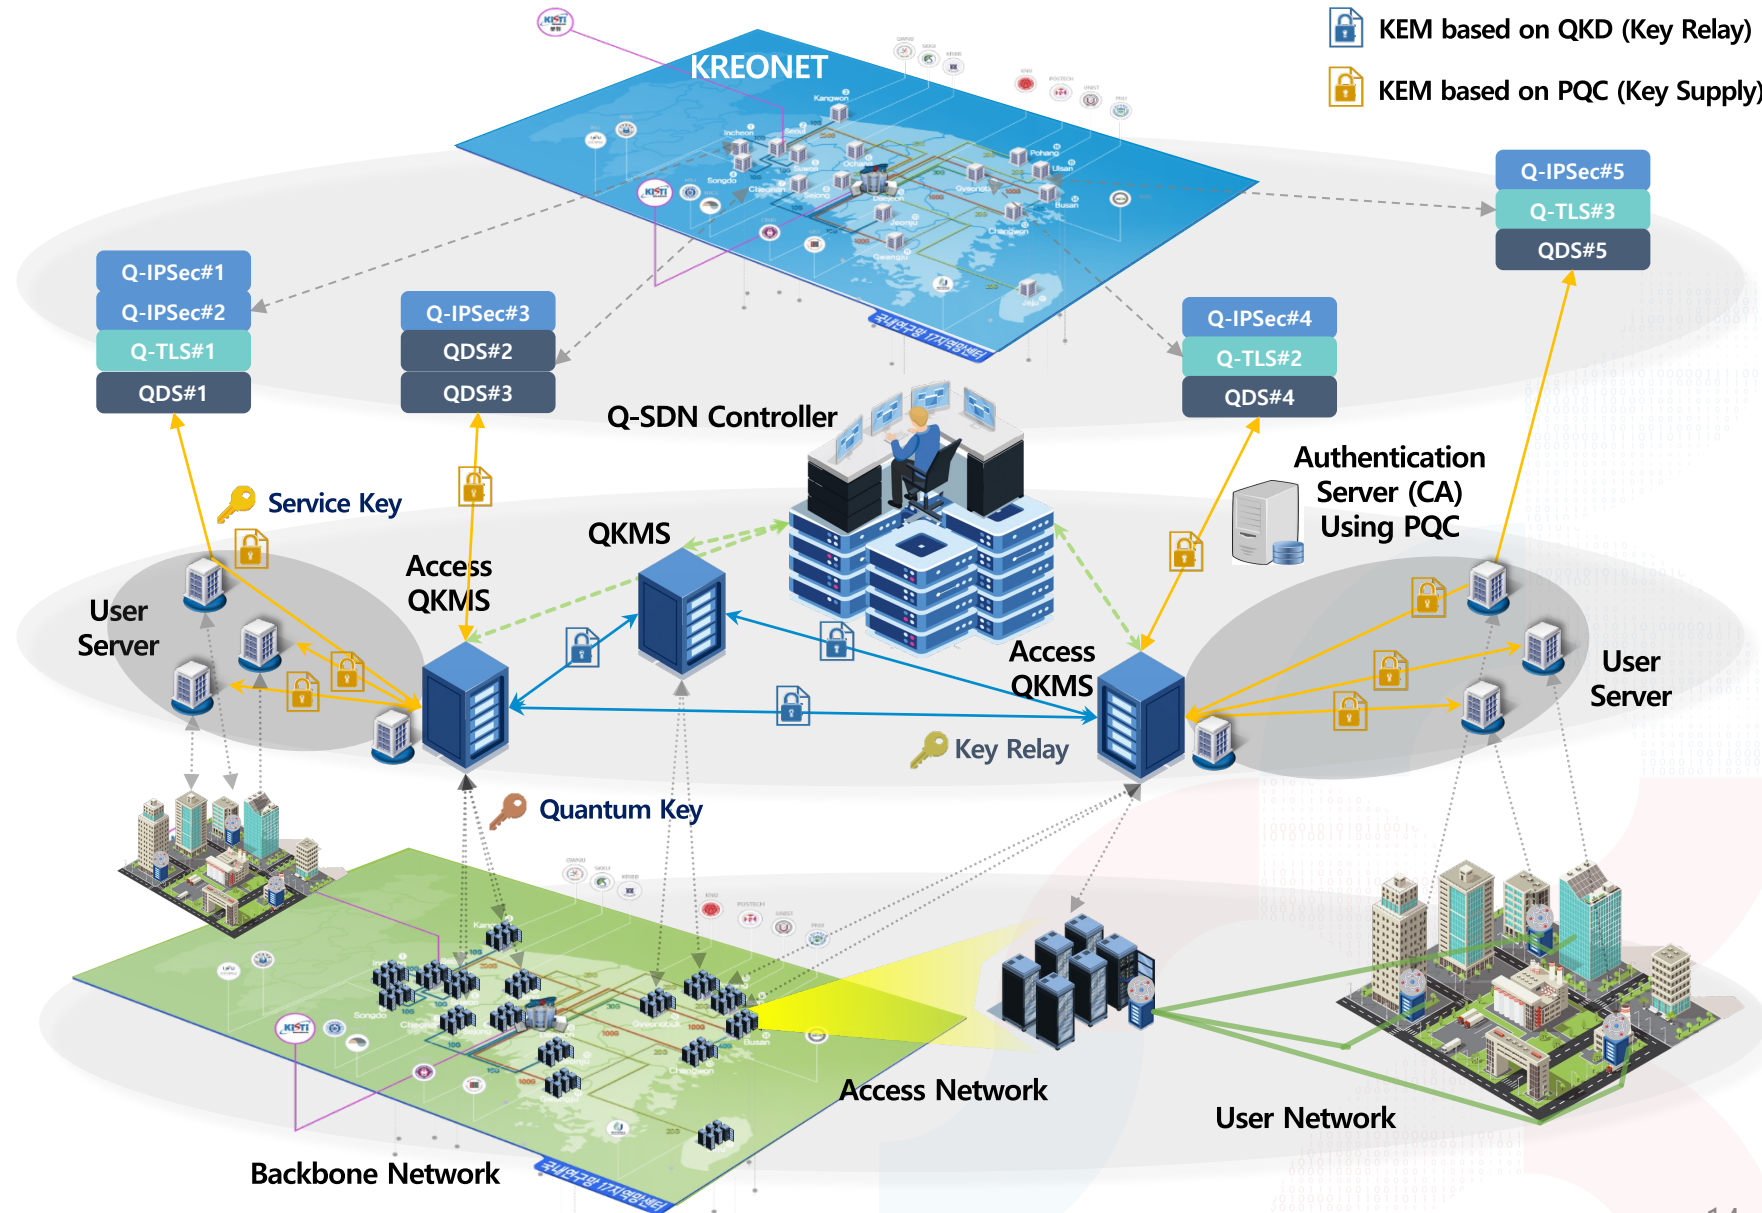

KISTI - CERN
: 20G → 2*100G

<https://twiki.cern.ch/twiki/bin/view/LHCOPN/OverallNetworkMaps>

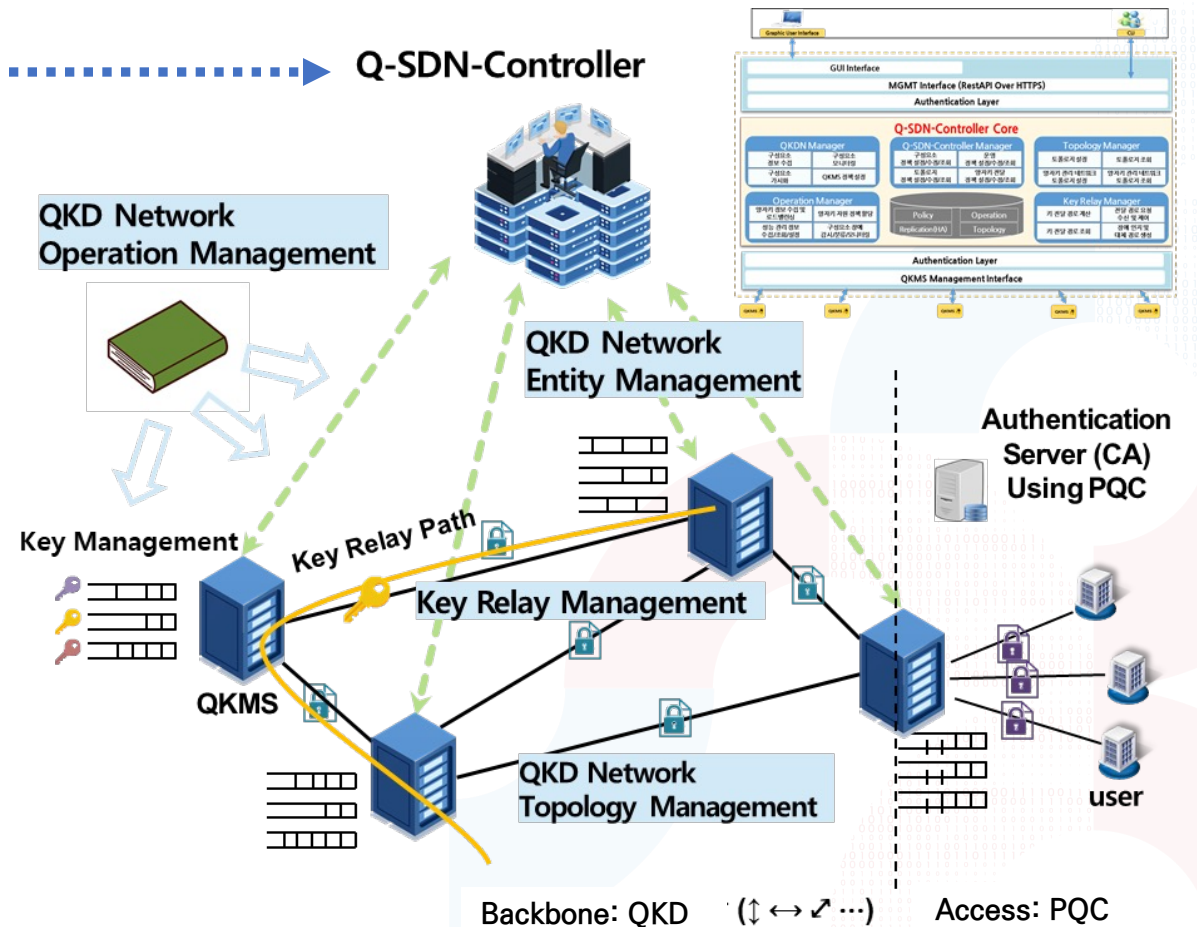

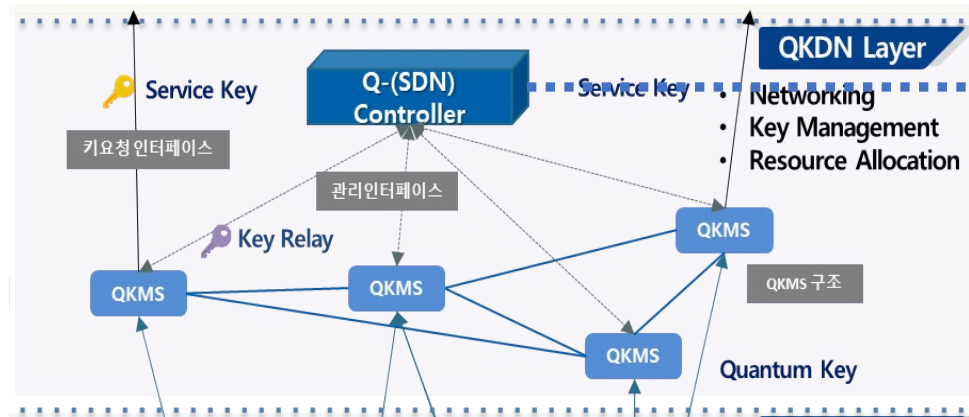

QKD system for KREONET

- Enhancing the security of KREONET through preemptive action against quantum computers
- QKD system for backbone network
 - Long-distance QKD system development
- QKD system for access network
 - Multiplexable QKD system with reasonably sized receiving end
- Networkization of QKD system
 - Reduction of cost, complexity, and operational difficulty of QKD system

QKD Management System

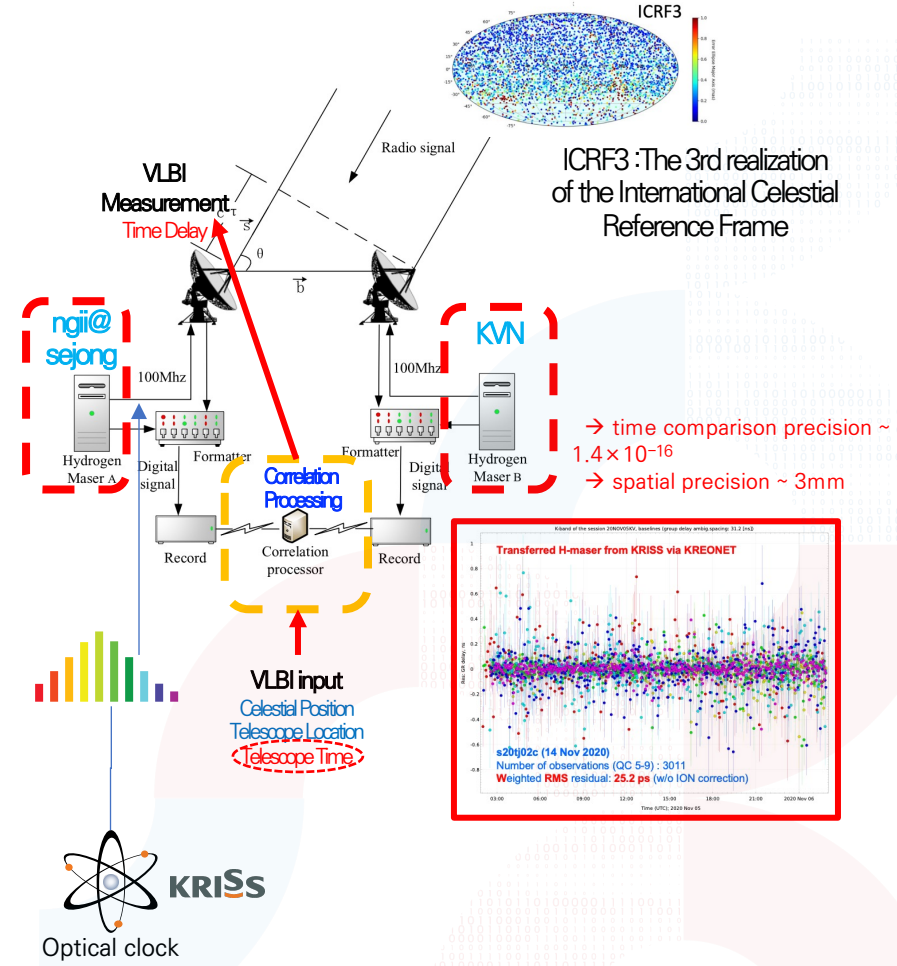

- Highly compatible KREONET QKMS with quantum crypto communication
- KREONET Q-SDN Controller for integrated control of QKDN
- QKDN Operation & Management Protocol
- Single Domain → Multiple Domain → Inter-Domain → Cross Layer → Orchestration & Intelligence

High-Precision Time Synchronization/Measurement with Broadband-VLBI

VLBI antenna
@ Sejong Space Geodetic Observation Center

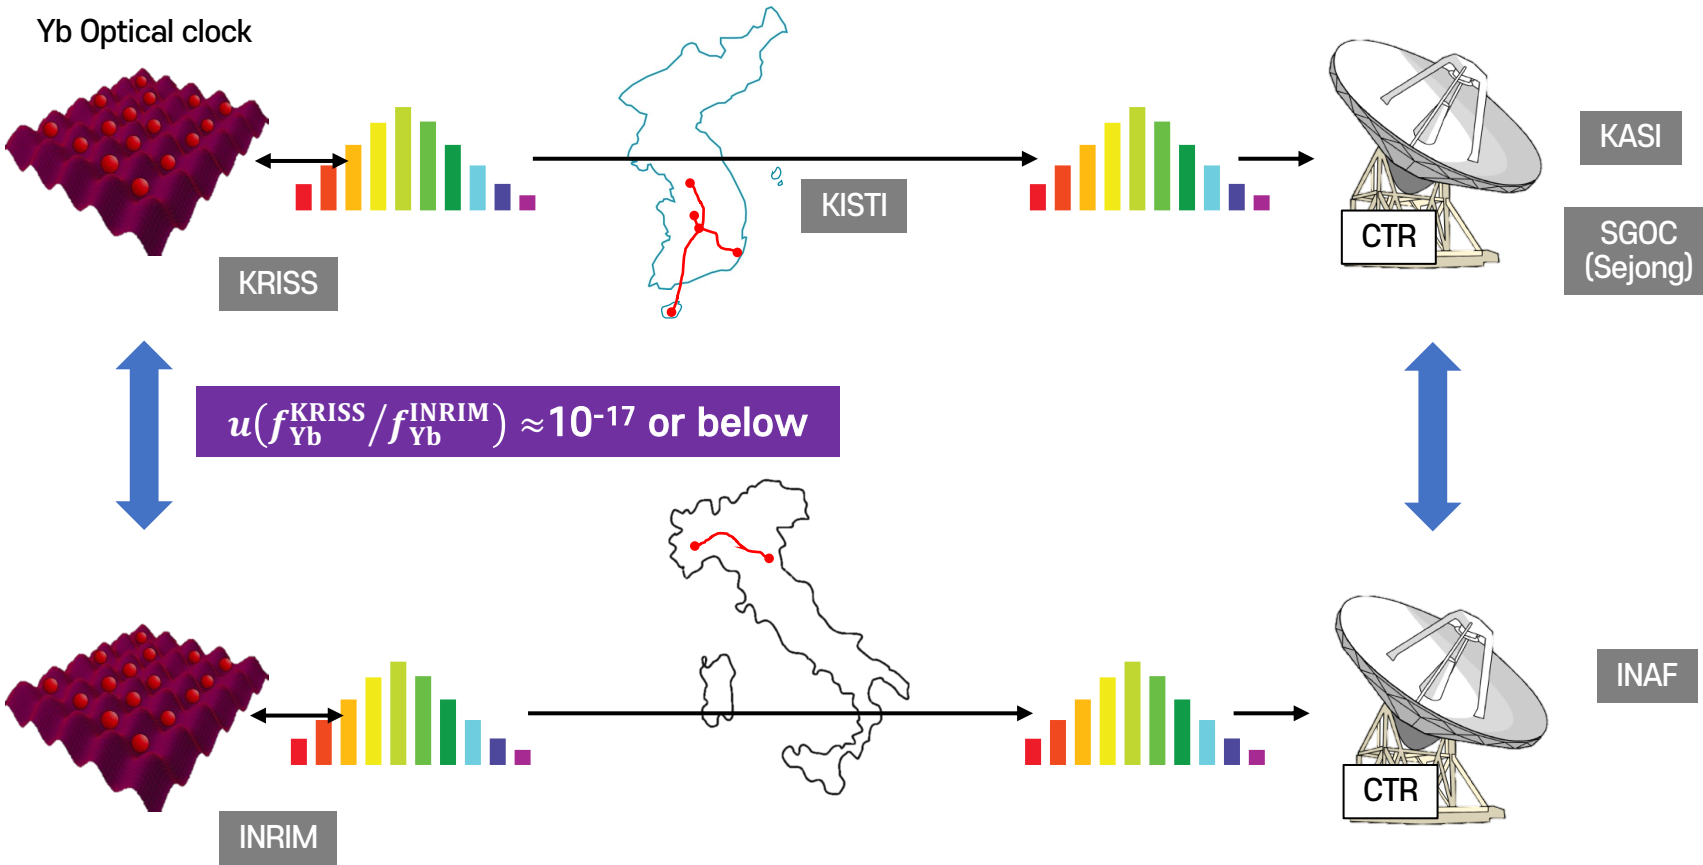

ICRF3 : The 3rd realization of the International Celestial Reference Frame

→ time comparison precision ~ 1.4×10^{-16}
→ spatial precision ~ 3mm

Inter-continental optical clock comparison using broadband VLBI

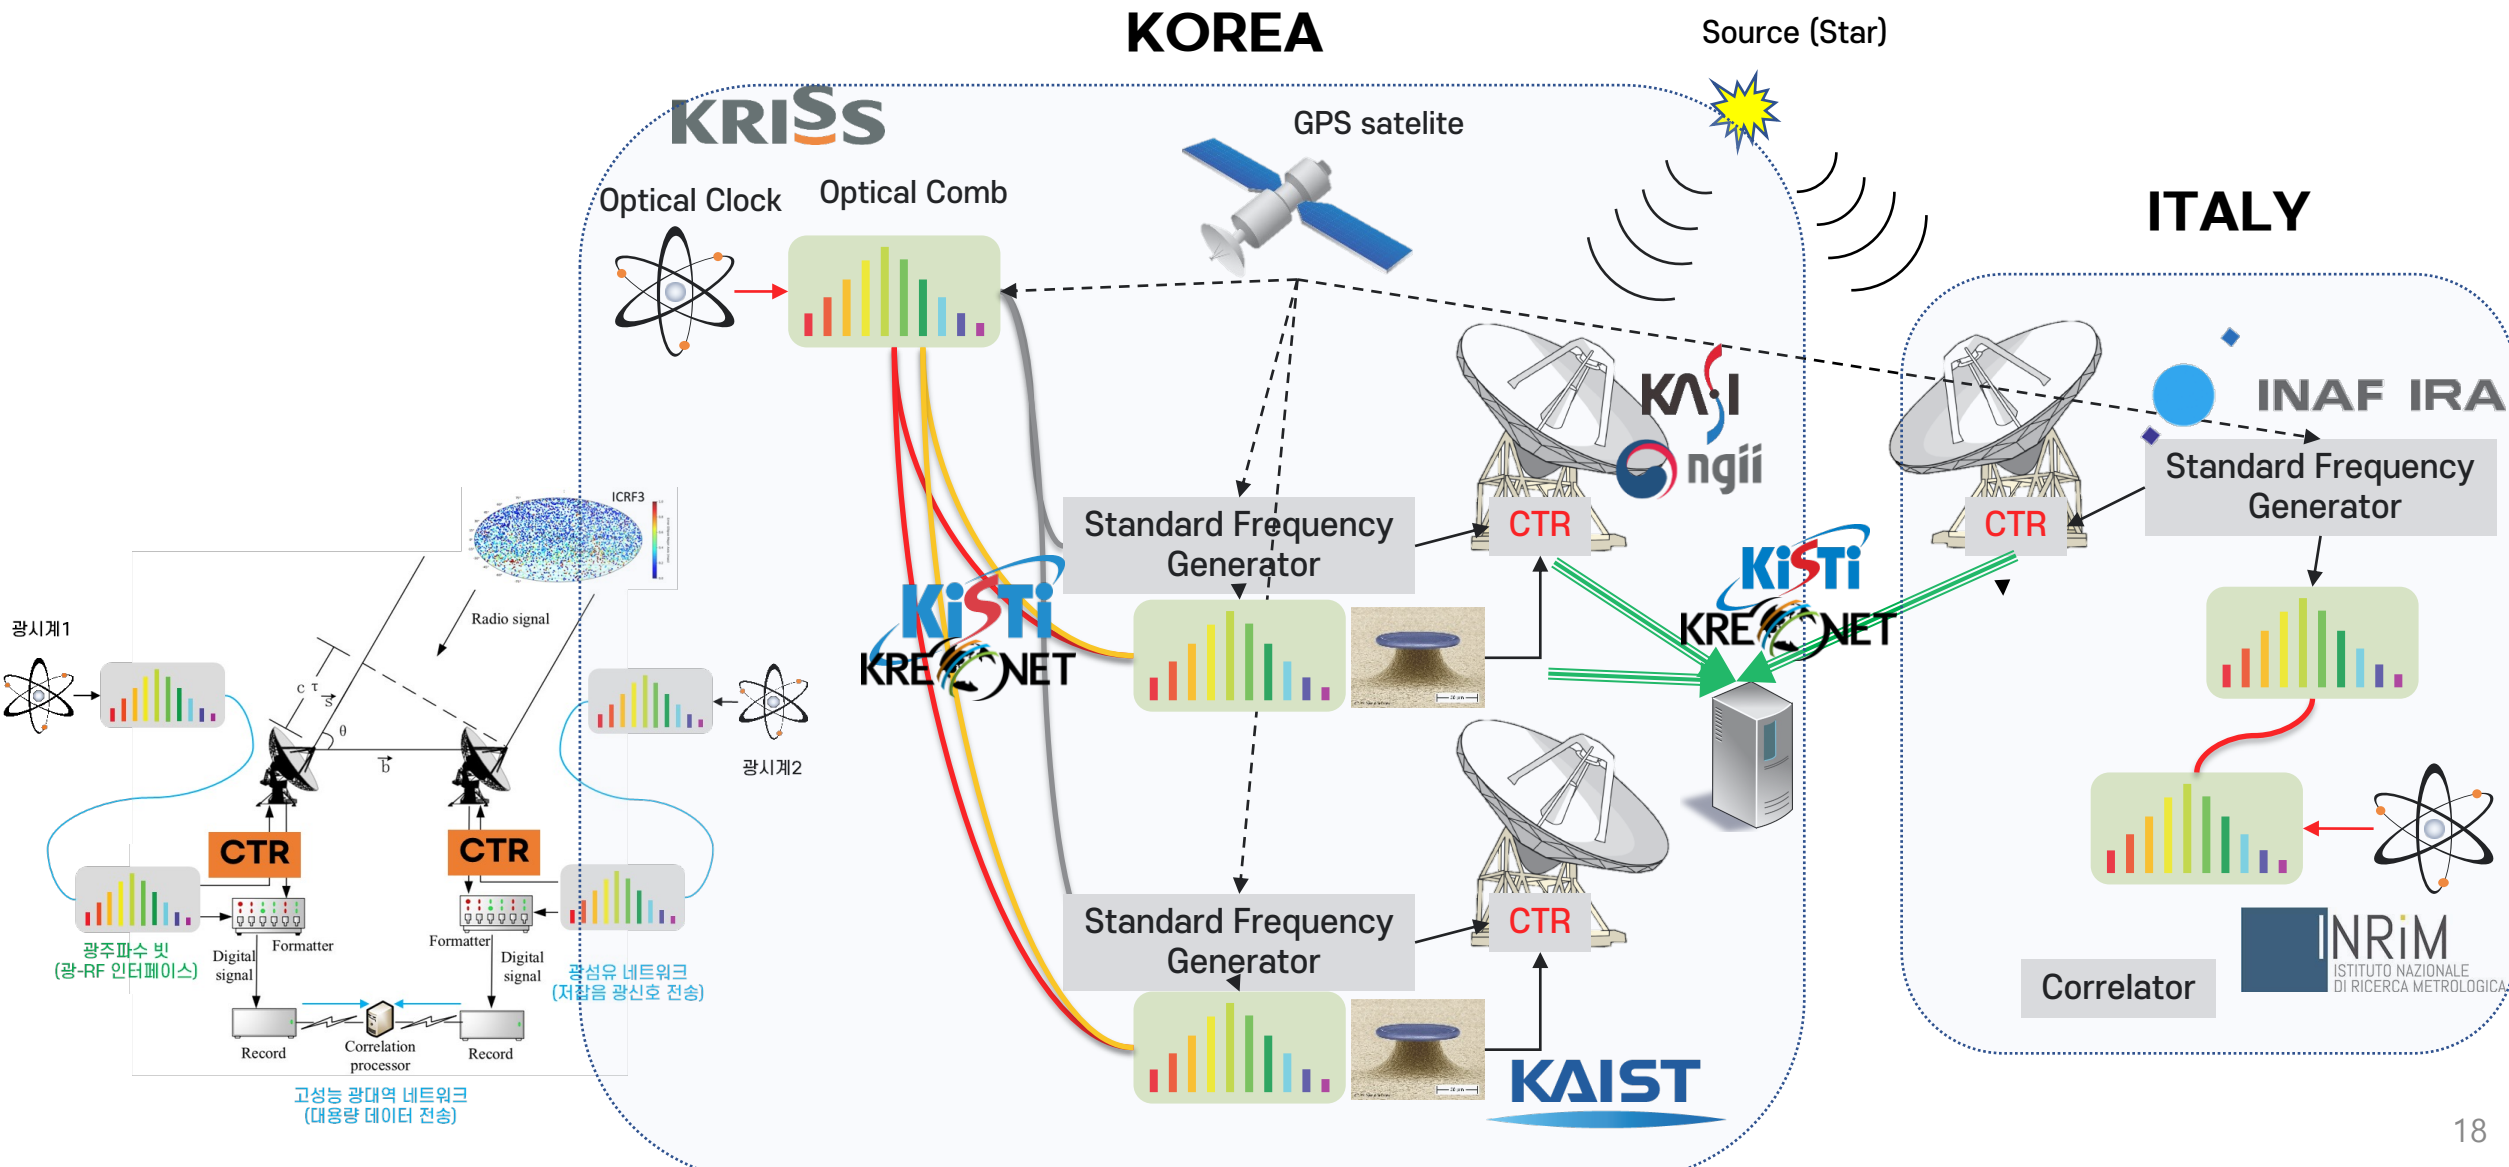

5 years funding (about 7M USD) new project (2022~)

	KOREA	ITALY
Optical clock	Yb, running	Yb/Sr, running
Fiber link	KRISs – KISTI – KVN (except Jeju)	INRIM – Medicina
Transferred frequency	RF (OSTT, PikTime) CW laser f-comb @ Sejong or KVN	CW laser f-comb @ Medicina
VLBI	22/43/86 GHz @ Sejong 22/43/86 GHz @ KVN	22/43/86 GHz @ Medicina

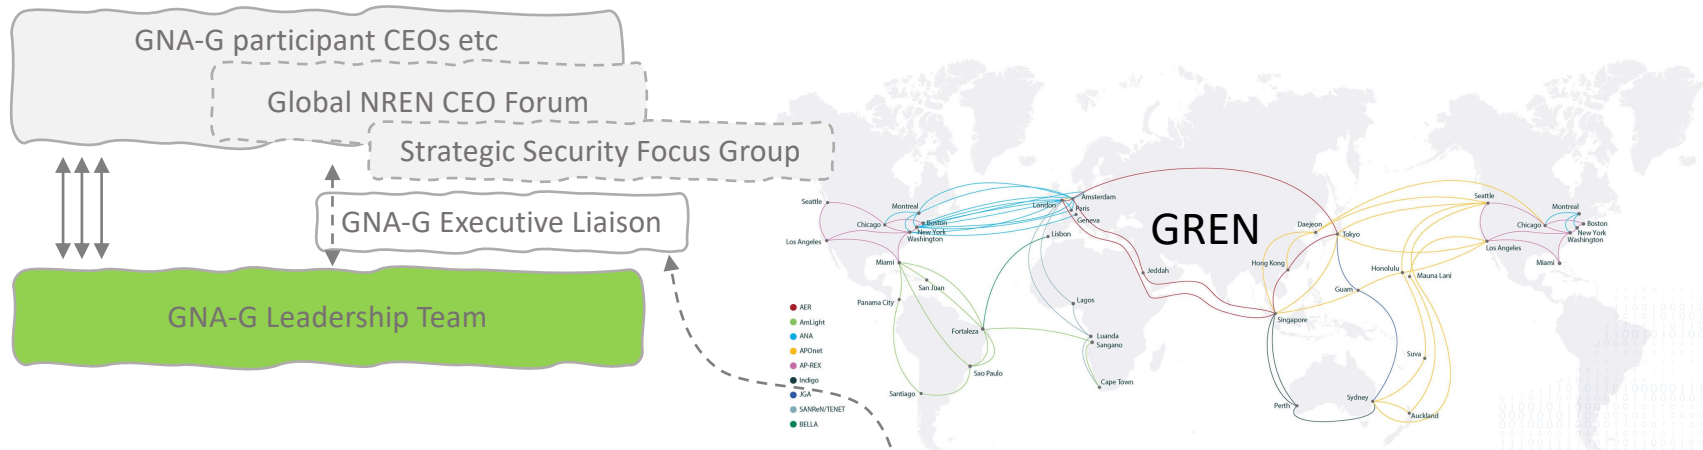

CTR : Compact Triple-band Receiver (K,Q, W band)

Inter-continental optical clock comparison using broadband VLBI
