Introduction to Safespring

- At Safespring we have a long history of delivering cloud infrastructure services to the research and education market. Our platform enables open standards, GDPR compliance and digital sovereignty
- Safespring is founded in 2014. Services are based on open source framework like OpenStack for virtual Compute and Ceph for Storage services
- Staff from the NREN sector
- Directly connected to the R&E Networks
- SSO with (Feide & Swamid) eduGAIN
- member of GAIA-X

Safespring engagement in NREN community since 2015
